

WEEE Compliance Declaration – October, 2025

Electrical products designed and manufactured by Kamco Limited at our St Albans factory are covered by the EU Electrical and Electronic Waste Directive (WEEE). The aims of the directive are to minimise the amount of material entering the waste stream, and to provide funding for treatment facilities in order to maximise recovery and recycling.

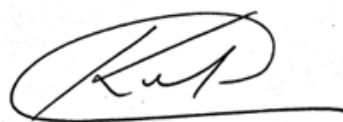

Our Producer registration number is: WEEE/RM08007.

Obligation to comply with WEEE in the UK mainland falls to the “Producer”, who in this case is Kamco Ltd. The “Producer” must meet the requirements of WEEE regulations and associated compliance schemes. Our WEEE obligation is for our products sold into the business, industrial, and commercial market (also known as Business-to-Business WEEE or B2B WEEE). We do not sell products into the domestic/household markets.

Our products are sold into the UK market to end-users directly or via our network of distributors and this usually means that our products move beyond our reach for economically providing collection and recycling.

We consider it inappropriate to cover the cost of recycling our customers’ commercial and industrial products by adding this cost to the purchase price of every product sold throughout the UK mainland. We believe it is simpler and fairer for the business end user to meet costs when products actually reach their end of life.

However, in order to support the drive for recycling any of our end-of-life products returned to our St Albans premises, carriage paid by the customer, will be included in our recycling service **free of charge**.
