Kamco

SystemSafe

WATER-TESTING DOCUMENT

Kamco *SystemSafe Central Heating PROTECTOR*

MADE IN BRITAIN

Directions for Use
Add this treatment via filling kit, a partially drained radiator, power flush machine, through F & E tank or magnetic filter. Shake bottle and use entire contents. After treatment, bleed radiators to remove any trapped air.

Dose Rate
Minimum dosage rate 500ml per 100-litre system capacity. Double-dose systems filled via a base-exchange water softener.

Technical Info
Long-term protection of central heating systems against corrosion and limescale - NSF approved. Compatible with iron, steel, copper, aluminium, plastics and rubbers including header tanks, seals and plastic pipes commonly used in central heating system construction.

Safety
Keep out of reach of children. Dispose of contents/container in accordance with national regulations. Safety data sheet available on request. DO NOT USE with PRIMATIC single-feed cylinders.

Kamco Limited, Unit 9, Curo Park, Frogmore, St Albans, Herts, AL2 2DD, UK.
